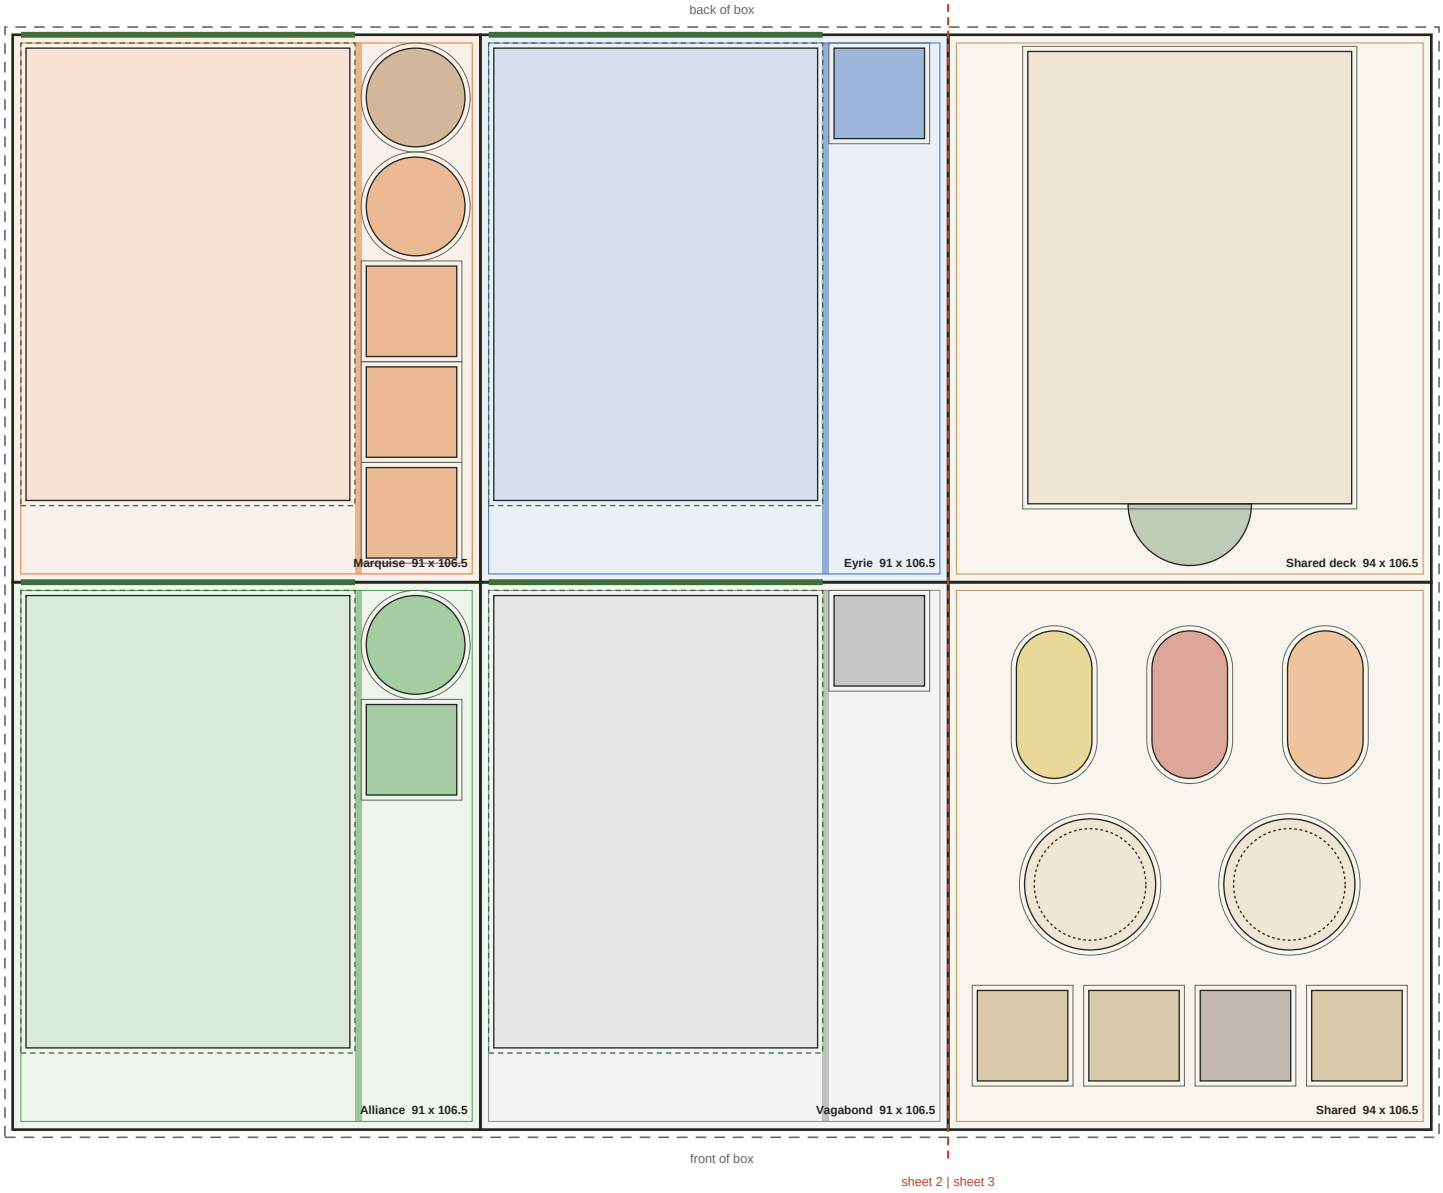
Root insert: layout check

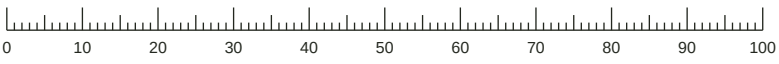
Base game, Leder Games edition. Insert 276 x 213 x 46 mm in a box cavity of about 279 x 216 x 71 mm.



How to use this

1. Print sheets 2 and 3 at Actual size / 100%. Turn off "Fit to page" or "Shrink oversized pages".
2. Check the scale: the 100 mm ruler at the bottom of each sheet should measure exactly 100 mm.
3. Cut sheet 3 along its CUT line. Lay it over sheet 2 so the cut edge sits on sheet 2's ALIGN line and the + marks line up, then tape the sheets together.
4. Lay the real pieces on their outlines, or trim along the dashed box outline and drop the sheet into the box.

Key: filled shapes = pieces at actual size | thin outline around a piece = pocket with 1 mm clearance
green dashed box = faction card slot under the warrior shelf; thick green edge = where the cards slide out
large tinted rectangle = loose warrior bin (sits on the shelf above the cards) | coloured bar = divider

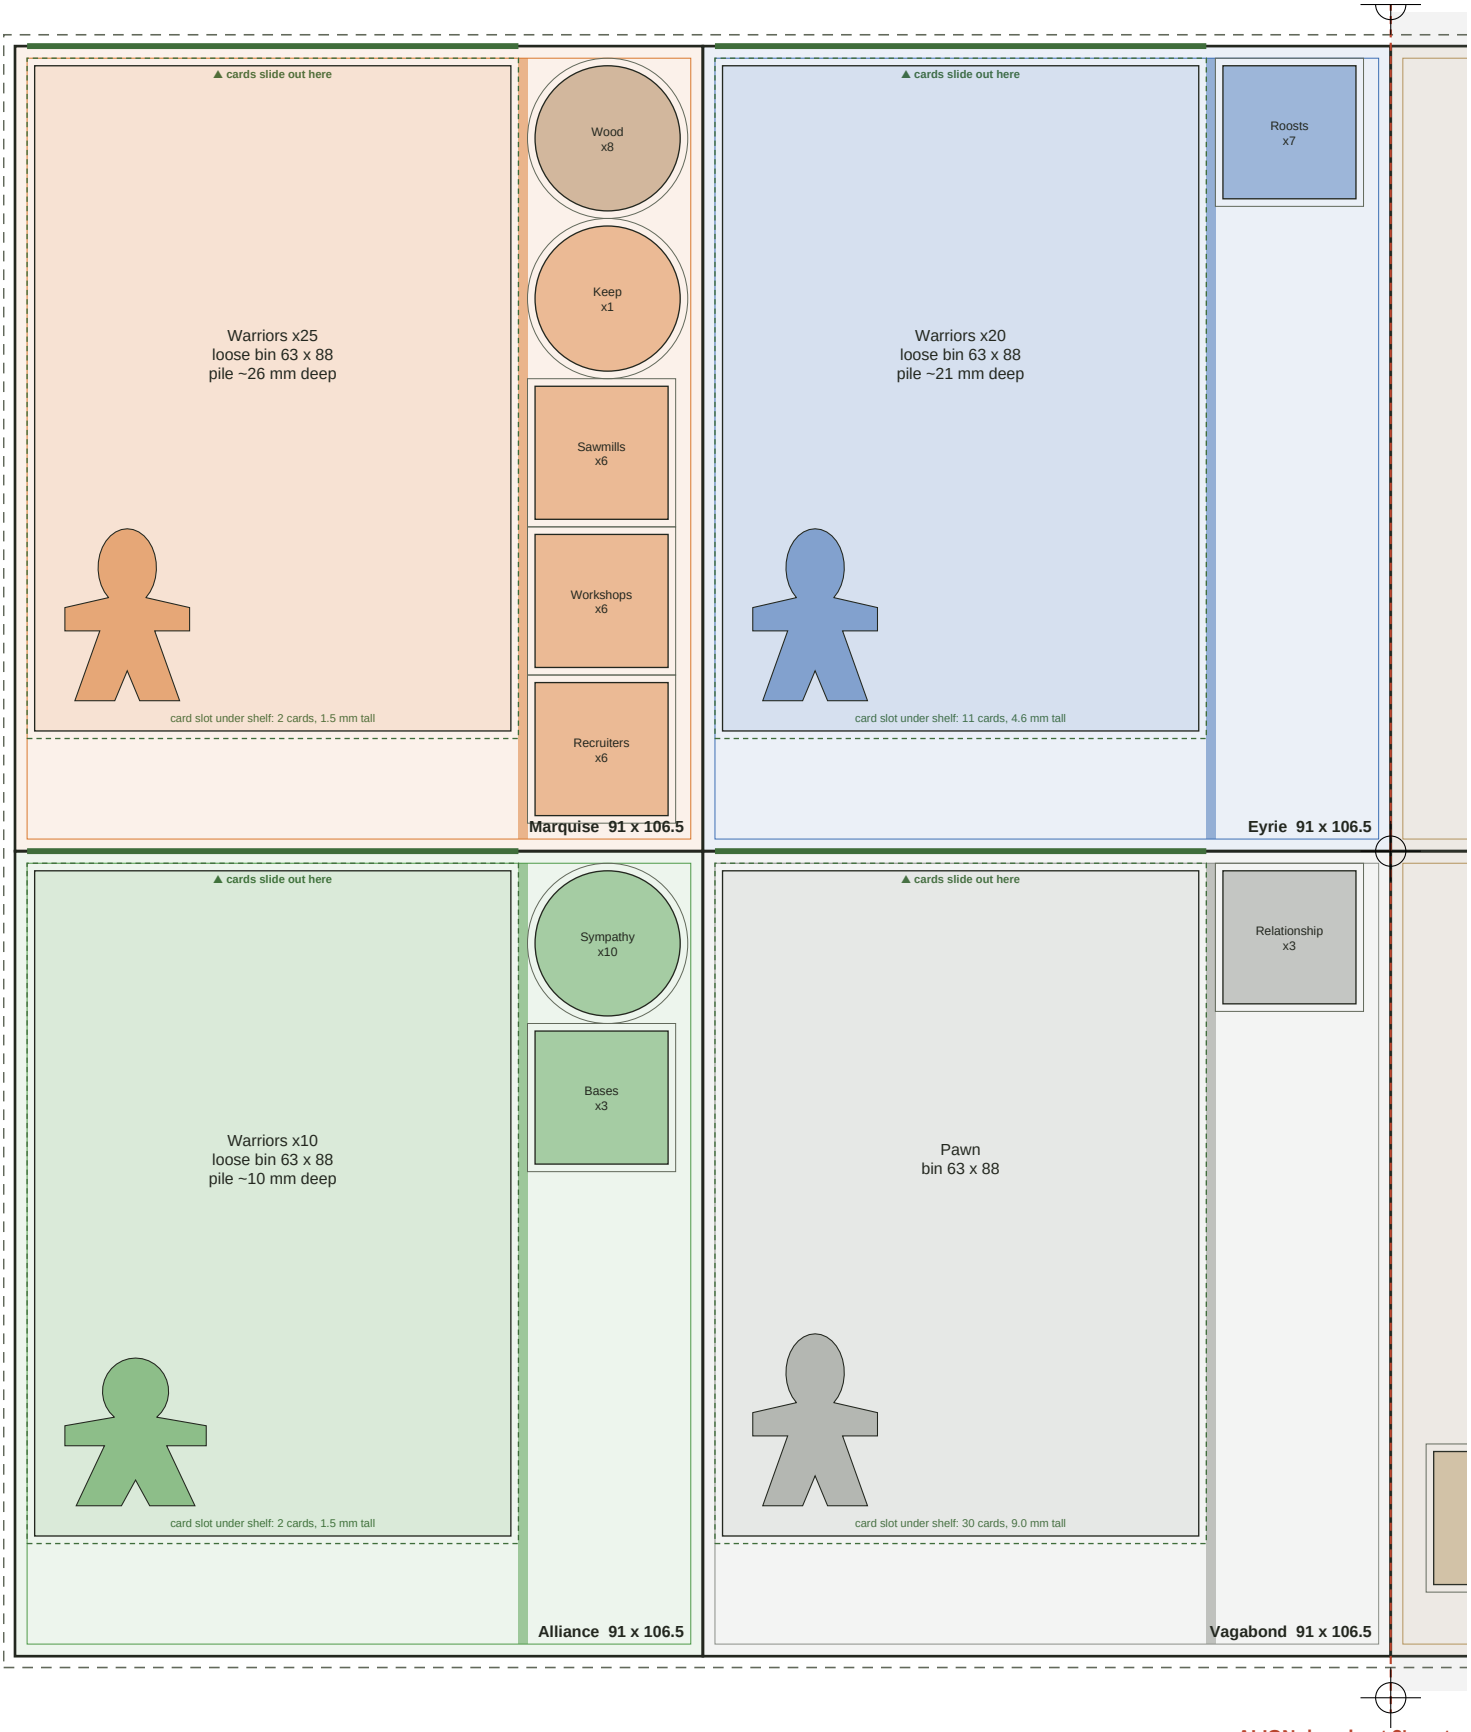


100 mm: measure to check the print scale

1 inch wide

Sheet 2 of 3: faction boxes (actual size)

Print at 100% / Actual size. Back of the box is at the top of the sheet.



ALIGN: lay sheet 3's cut edge here

0 10 20 30 40 50 60 70 80 90 100

100 mm: measure to check the print scale

1 inch wide

Sheet 3 of 3: shared deck and shared tray (actual size)

Print at 100% / Actual size. Back of the box is at the top of the sheet.
